

**A GRAMMAR OF TARIANA,  
FROM NORTHWEST AMAZONIA**

Alexandra Y. Aikhenvald

Research Centre for Linguistic Typology  
La Trobe University, Melbourne

Cambridge University Press - 2003

*For my Tariana family*

# Contents

*List of tables, schemes and diagrams* xi

*Preface* xiii

*Acknowledgements* xv

*Organisation and cross-referencing* xvii

*List of abbreviations* xviii

*Map* xx

1. The language and its speakers 1
  - 1.1 Linguistic profile of Tariana 1
  - 1.2 Tariana and the multilingual setting of the Vaupés 6
  - 1.3 Historical information about the Tariana 9
  - 1.4 Social organisation 11
  - 1.5 Ceremonies and beliefs 13
  - 1.6 Naming practices 15
  - 1.7 Nonverbal communication 16
  - 1.8 What we know about the Tariana language 17
    - 1.8.1 Denominations of the language 17
    - 1.8.2 Previous studies of the language 18
  - 1.9 Materials and speakers 18
2. Phonology 25
  - 2.1 Segmental phonology 25
    - 2.1.1 Consonants 25
    - 2.1.2 Vowels 32
  - 2.2 Syllable structure, vowel sequences and the problem of diphthongs 34
    - 2.2.1 Syllable structure 34
    - 2.2.2 Vowel sequences and diphthongs 35
  - 2.3 Stress 37
    - 2.3.1 Primary stress 37
    - 2.3.2 Stress in monomorphemic words 38
    - 2.3.3 Stress in polymorphemic words 38
    - 2.3.4 Secondary stress 39
    - 2.3.5 Vowel reduction 39
  - 2.4. Phonological word 40
    - 2.4.1 Primary stress and prosodic classes of morphemes 40
    - 2.4.2 Nasalisation 42
    - 2.4.3 Aspiration 42
    - 2.4.4 Vowel harmony 44
    - 2.4.5 Word delimiting prosodic parameters in Tariana: a summary 45
  - 2.5 Phonological processes 46
    - 2.5.1 *H*-metathesis 46

2.5.2	Vowel fusions	47
2.5.3	Phonological processes within roots and within affixes	52
2.6	Prosodic classes of morphemes and their properties	53
2.7	Pause marking	60
2.8	Phonological phrase	63
2.9	Intonation patterns	64
3.	Word classes	66
3.1	Open word classes	66
3.1.1	Verbs	66
3.1.2	Nouns	68
3.1.3	Adjectives	72
3.1.4	Word class-changing morphological derivations	77
3.2	Manner adverbs and time words	77
3.3	Closed classes	80
3.4	Word classes and functional slots: an overview	81
4.	Nominal morphology and noun structure	82
5.	Noun classes and classifiers	87
5.1	Overview of the multiple classifier system	87
5.1.1	Organisation of the system	87
5.1.2	Noun classes	99
5.1.3	Classifiers as nominal derivational suffixes	101
5.1.4	Numeral classifiers	103
5.1.5	Verbal classifiers	104
5.1.6	Classifiers with modifiers from closed classes	105
5.2	Functions of classifiers	115
5.3	Repeaters and 'ad hoc' classifiers	117
5.3.1	The use of repeaters	117
5.3.2	The functions of repeaters	118
5.3.3	'Ad hoc' classifiers	119
5.3.4	Classifiers and the lexicon	121
5.4	Summary	121
6.	Possession	122
6.1	Personal cross-referencing	122
6.1.1	The system	122
6.1.2	The indefinite prefix	123
6.1.3	Impersonal cross-referencing	126
6.2	Obligatorily possessed nouns	127
6.3	Optionally possessed nouns	128
6.4	Archaisms, innovations and irregularities in obligatorily possessed nouns	129
6.4.1	Archaisms and innovations in marking inalienable possession	129
6.4.2	Expansion of optionally possessed nouns	129
6.4.3	Retention of possessive suffixes on optionally possessed nouns	131
6.4.4	A common Arawak irregularity in possession marking	133

6.5 Possessive classifiers	133
6.5.1 Constructions with the possessive <i>-ya-</i>	134
6.5.2 Constructions with a generic possessed classifier <i>-ya/upe</i>	136
6.6 Conclusions	137
7. Case marking and grammatical relations	139
7.1 General properties of case marking system	139
7.2 Semantics and function of core cases	140
7.2.1 The marking of A, S <sub>a</sub> , S <sub>o</sub>	140
7.2.2 The marking of non-A/S <sub>a</sub> /S <sub>o</sub>	143
7.3 The semantics and function of oblique cases	148
7.3.1 Locative case	148
7.3.2 Instrumental-comitative case	150
7.4 Omission of oblique case markers	154
7.5 Marking case more than once	155
7.6 Double case marking and double marking of syntactic function	158
7.6.1 Double case marking	158
7.6.2 Double marking of syntactic function	160
7.7 Summary	163
8. Number	164
8.1 Number marking	164
8.1.1 Inanimate nouns	164
8.1.2 Animate nouns	165
8.1.3 Kinship nouns	166
8.1.4 Uncountable nouns	168
8.1.5 Pluralia tantum	170
8.1.6 Singulatives	171
8.1.7 Associative plural	172
8.2 Plural marking on modifiers	173
8.3 Multiple marking of number	176
8.4 Number agreement	180
8.5 Summary	182
9. Further nominal categories	183
9.1 Tense	183
9.1.1 Nominal future	183
9.1.2 Nominal past	185
9.1.3 Nominal and clausal tense marking: a comparison	187
9.2 Extralocality and restrictivity markers	188
9.3 Contrastive marker	189
9.4 Conjoining morphemes	191
9.5 Approximative	192
9.6 Diminutive and augmentative	193
9.6.1 Diminutive	193
9.6.2 Augmentative	194
9.7 Pejorative	195

10. Derivation and compounding 196
  - 10.1 Productive derivational suffixes 196
  - 10.2 Semi-productive and non-productive derivational suffixes 197
  - 10.3 Deverbal nominalising affixes 200
  - 10.4 Classifiers and nominal derivation 200
  - 10.5 Compounding 201
  
11. Closed word classes 203
  - 11.1 Personal pronouns 203
  - 11.2 Specifier articles 204
  - 11.3 Demonstratives 206
  - 11.4 Interrogative-distributive *kwa-/kwe-* 208
  - 11.5 Gestural deictic *khi* 213
  - 11.6 Distributive individualiser *napada* 214
  - 11.7 General indefinite *pa:-* 215
  - 11.8 Numerals 217
  - 11.9 Quantifiers 219
  - 11.10 Connectives 221
  - 11.11 Adpositions 222
  
12. Verb classes and predicate structure 234
  - 12.1 Verb classes 234
    - 12.1.1 Ambitransitive, transitive, ditransitive and extended transitive verbs 235
    - 12.1.2 Intransitive verbs 239
    - 12.1.3 Prefixless verbs with two arguments, and extended intransitive verbs 241
    - 12.1.4 Secondary verbs 244
    - 12.1.5 Copula verbs 250
  - 12.2 The structure of a predicate 253
  - 12.3 Verb root structure and verbal derivations 255
  - 12.4 Defining a verbal word 256
  
13. Valency changing and argument rearranging mechanisms 258
  - 13.1 Passive 258
  - 13.2 Reflexive-reciprocal 263
    - 13.2.1 Reciprocal meanings 263
    - 13.2.2 Reflexive meanings 266
  - 13.3 Increasing transitivity 267
    - 13.3.1 Morphological causatives 267
    - 13.3.2 Causative serial verb constructions 274
    - 13.3.3 Periphrastic causatives 275
    - 13.3.4 Causative mechanisms in Tariana: a comparison 277
  - 13.4 Argument-adding derivation 279
  - 13.5 Argument-manipulating derivation 283
  - 13.6 Summary 286
  
14. Tense and evidentiality 287
  - 14.1 General remarks 287

14.2	Tense-evidentiality in affirmative clauses	289
14.2.1	Semantics of tenses	289
14.2.2	Visual evidentials	293
14.2.3	Non-visual evidentials	296
14.2.4	Inferred evidentials	299
14.2.5	Reported evidentials	302
14.2.6	Lexical reinforcement of evidentials	304
14.2.7	Preferred evidentials and their cultural correlates	305
14.2.8	Omission of evidentials and speakers' competence	309
14.3	Tense-evidentiality in interrogative clauses	311
14.3.1	Visual interrogative evidentials	312
14.3.2	Non-visual interrogative evidentials	313
14.3.3	Inferred interrogative evidentials	315
14.3.4	Omission and variability of interrogative evidentials	317
14.3.5	Preferred interrogative evidentials	318
14.4	Future	320
14.5	Final remarks	321
15	Aspect, Aktionsart and degree	324
15.1	Aspect markers	324
15.1.1	'Short duration, little by little' <i>-ina</i>	324
15.1.2	Habitual prescribed <i>-hyuna</i>	326
15.1.3	Customary <i>-kape</i>	328
15.1.4	Habitual repetitive <i>-nipe</i>	329
15.1.5	Anterior <i>-nhi</i>	330
15.1.6	Non-completed ongoing <i>-daka</i>	334
15.1.7	Non-completed ongoing proximate <i>-sida</i>	336
15.1.8	Already accomplished <i>-sita</i>	337
15.1.9	Repetitive <i>-pita, -ta</i>	339
15.1.10	Completive <i>-niki</i>	340
15.1.11	Not quite completed <i>-maña</i> 'just about, almost'	342
15.2	Aktionsart enclitics	342
15.2.1	Aktionsart enclitics with corresponding verbs	343
15.2.2	Aktionsart enclitics not used as independent verbs	348
15.2.3	Semantic and syntactic properties of Aktionsart enclitics	363
15.3	Degree markers	366
15.4	Emphatic markers	367
16	Mood and modality	371
16.1	Imperatives	371
16.1.1	Unmarked imperative	371
16.1.2	Proximate, distal and postponed imperatives	372
16.1.3	Detrimental imperative	374
16.1.4	Imperative by proxy	376
16.1.5	Conative precative	377
16.1.6	Cohortative	378
16.1.7	Polite suggestion	378
16.1.8	Additional imperatives	379
16.2	Frustrative	380

- 16.3 Intentional 383
- 16.4 Apprehensive 384
- 16.5 Uncertainty 387
- 16.6 Conditional 390
- 16.7 Purposive 393
- 16.8 Counter-expectation 396
- 16.9 Declarative-assertive 398
  
- 17. Negation 400
  - 17.1 General characteristics of Tariana negation 400
  - 17.2 Clausal negation in non-prohibitive clauses 400
  - 17.3 Negative imperative 409
  - 17.4 Negative prefix *ma-* 410
  - 17.5 Inherently negative lexemes 411
  - 17.6 Negative *ne* and negative response 419
  - 17.7 Double negation 421
  
- 18. Serial verb constructions and verb compounding 423
  - 18.1 Working definition of a serial verb construction 423
  - 18.2 Defining properties of serial verb constructions in Tariana 424
  - 18.3 Assymmetrical serial verb constructions 430
  - 18.4 Symmetrical serial verb constructions 440
  - 18.5 Ambient serial verb constructions 442
  - 18.6 A comparison of three types of serial verb constructions 443
  - 18.7 Verb compounding 446
  
- 19. Complex predicates 449
  - 19.1 Epistemic complex predicate with repetition 449
  - 19.2 Prolonged customary action 450
  - 19.3 Complex predicate with a subordinator and repetition 451
  - 19.4 Passive complex predicate with auxiliary 452
  - 19.5 Apprehensive complex predicate with auxiliary 453
  - 19.6 Admirative complex predicate 453
  - 19.7 Irresultative complex predicate 454
  - 19.8 Complex predicate of small extent 456
  - 19.9 Quasi-serial verb construction 456
  - 19.10 Complex predicates with the optional subordinator *kwe* and purposive mood 457
  - 19.11 Clause-like complex predicate 457
  - 19.12 Complex predicates and serial verb constructions: a comparison 458
  
- 20. Participles and nominalisations 460
  - 20.1 Participles 460
  - 20.2 Nominalisations and converbs 461
    - 20.2.1 The *-nipe* nominalisation 461
    - 20.2.2 The *-mi* nominalisation 465
    - 20.2.3 The *-/i* nominalisation 467
    - 20.2.4 Three nominalisations: a comparison 472

20.2.5	Nominalisations and subordinate clauses	472
20.3	Other derivational devices	473
21.	Clause types and other syntactic issues	475
21.1	The structure of noun phrases	475
21.1.1	Position of adjectival and closed class modifiers with respect to the head of a noun phrase	475
21.1.2	Discontinuous noun phrases	479
21.1.3	Appositional constructions	480
21.1.4	Headless noun phrases	482
21.1.5	Possessive and adpositional noun phrases	483
21.2	Coordination of noun phrases	484
21.3	Structure of predicates	487
21.4	Types of clauses	487
21.4.1	Declarative clauses	488
21.4.2	Imperative clauses	502
21.4.3	Interrogative clauses	502
21.4.4	Exclamatory clauses	506
21.4.5	Dependent clauses: an overview	506
21.5	Grammatical relations	507
21.5.1	Defining 'subjects'	507
21.5.2	Objects and obliques	511
22.	Subordinate clauses and clause linking	515
22.1	Clauses marked with sequencing enclitics	515
22.1.1	Switch reference-sensitive sequencing enclitics	516
22.1.2	Non-switch reference-sensitive sequencing enclitics	525
22.2	Sequential <i>-ka</i>	528
22.3	Subordinate clauses marked with adpositions	532
22.4	Subordinate clauses and clause linking	534
23.	Relative clauses	537
23.1	Grammatical properties of relative clauses	537
23.2	Content question words as markers of relative clauses	543
24.	Complement clauses	547
24.1	Complement clauses marked with <i>-ka</i> 'subordinator'	547
24.2	Complement clauses marked with purposive	551
24.3	Complementation strategies	552
24.4	Interrogatives in complement clauses	556
25.	Discourse organisation	561
25.1	Pragmatic basis for constituent order	561
25.1.1	Order of words in NPs and multi-word predicates	562
25.1.2	Pragmatic basis for clausal constituent order	562
25.1.3	Constructions with fixed constituent order	568
25.1.4	'Doubling' of personal pronouns	571
25.2	Ellipsis	573
25.3	Floating enclitics and discourse	574

25.4 Repetition and sentence linking devices	576
25.4.1 Repetition	576
25.4.2 Sentence linking strategies	576
25.4.3 Discourse-organising phrase 'I am saying'	583
25.5 Grammatical properties of narratives and conversations	585
25.5.1 Narratives	585
25.5.2 Conversations	588
25.5.3 Code-switching	590
26. Issues in etymology and semantics	594
26.1 Tariana grammar and lexicon: an etymological perspective	594
26.1.1 Arawak grammar and lexicon in Tariana	594
26.1.2 Semantic restructuring under the influence of East Tucano languages	595
26.1.3 Lexical borrowings	596
26.2 Semantic issues relevant for grammar	598
26.2.1 'Same' and 'different'	599
26.2.2 Generic and specific terms	603
26.2.3 Positional verbs	608
26.3 Remarks on Tariana lexical semantics	616
<i>Appendix. The main features of the Tariana dialects</i>	620

- 14.2 Preferences for evidentials in interrogative clauses 318
- 14.3 Evidentials in question-response: Tariana and East Tucano 319

## Preface

This is a grammar of Tariana, a member of the Arawak family – the largest language family of Central and South America. Tariana was once a dialect continuum spoken by over 1500 people in various settlements along the Vaupés river and its tributaries. The subgroups of Tariana used to constitute a strict hierarchy, and each would speak a different dialect. The difference between individual dialects is comparable to that between Romance languages. As the Catholic missions and white influence expanded, the groups highest up in the hierarchy abandoned Tariana. As the result, the language is actively spoken by only about 100 people, mostly adults, representatives of the lowest-ranking group Wamia|ikune, and is severely endangered. I started assembling data on the language in 1991 and have since worked with most speakers of this dialect of Tariana. As by-products of this work, we produced a bilingual Tariana–Portuguese dictionary, several collections of texts and a practical grammar, and launched a program for teaching Tariana in secondary school. The dedication of the consultants, their insights and their patience made it possible to carry out this daunting task.

This grammar contains an analysis of the Tariana language, starting from a brief characterisation of language and its speakers, then going on to phonology, morphology, syntax, discourse organisation and semantics. The analysis is cast in terms of a cumulative typological framework of linguistic analysis – which employs 'the fundamental theoretical concepts that underlie all work in language description and change' (Dixon 1997: 128) and in terms of which significant typological generalisations are postulated; this has come to be called basic linguistic theory. I have avoided employing any of the more specific formalisms (which come and go with such frequency).

Every chapter of this grammar includes a presentation of the facts of the language interwoven with arguments for their analysis within a typological framework. No attempt has been made to separate pure 'description' from theoretical interpretation. In particular, numerous features of Tariana go against what was thought to be 'universal' – for instance, having serial verbs and complex predicates of several distinct types as independent grammatical phenomena, or having gender and classifiers as overlapping means for noun categorisation. A typological perspective for each phenomenon is crucial for the analysis given here.

Tariana is spoken in the multilingual area of the Vaupés basin, characterised by strong cultural inhibition against language mixing – viewed predominantly in terms of loan morphemes. The long-term interaction between East Tucano languages and the Tariana dialect continuum has resulted in a rampant diffusion of patterns and calquing of categories – which include classifiers, tense-evidentiality, number marking and even pronominal cross-referencing. There is a strong areal convergence of patterns – rather than of forms – without, however, implying anything like the emergence of an 'identical' grammar. When appropriate, information on the areally diffused or genetically inherited character of a pattern is included in this grammar. A full analysis of contact-induced developments in Tariana is dealt with in a separate study (Aikhenvald forthcoming-a).

Detailed exemplification is provided for every grammatical point. Most examples come from texts, and a few from spontaneous – or carefully directed – conversation. An additional objective is to convey as much of the Tariana culture as possible through using naturally occurring examples. I avoid using elicited sentences; elicitation was limited to lexicon and to paradigms.

English glosses are kept as close as possible to the glosses and explanations offered by my consultants. When no English equivalent is readily available, a Portuguese word is used, e.g. abiu-fruit or mucura-rat; some semantically complicated terms are explained in the texts, or in Chapter 1. Readers should be warned against trying to draw conclusions concerning Tariana grammar and semantics from the study of translations.

Examples, tables and diagrams are numbered separately within each chapter. Footnotes are numbered separately for each chapter. The orthography used in the examples from languages other than Tariana, and language names, follows that of the sources (unless indicated otherwise).

This grammar can be used as a sourcebook for further typological studies, and as a model for further grammars of languages of Arawak and of other families of the Americas. It is far from being the last word on Tariana – this grammar is intended to provide a sound systematic foundation for further studies, reanalyses and reinterpretations.

It is my hope that this book will encourage linguists to go out into the field and document languages threatened by extinction (before it is too late to do so), notwithstanding the difficulties and temporary frustrations which necessarily accompany a fieldworker.

## Acknowledgements

My warmest thanks go to the Brito family who taught me their language and accepted me as a member of their family. When in July 1991 Graciliano Sanchez Brito ('Gara') appeared in a makeshift house in the township of São Gabriel da Cachoeira (state of Amazonas, Brazil) that I was sharing with a few students from the Federal University of Santa Catarina, little could I suspect that he would become my main teacher, and then my classificatory older brother. Later I met his brothers, Jovino and José Luiz, his sister Olívia, and his parents. His father, Cândido Brito – one of the few traditional speakers and a real treasure-chest of Tariana lore and culture – was an indefatigable and patient teacher. And his mother, Maria Sanchez – a Piratapuya herself – adopted me as her daughter and taught me quite a few secrets about the life of Vaupés women. Gara's cousin, Rafael, the youngest speaker of the Santa Rosa dialect, has always been extraordinarily helpful, besides being great fun to have around.

When I went to the villages of Iauaretê and Santa Rosa, I met Ismael (Mayê) Brito, Gara's older brother, and Leonardo Brito, Cândido's younger brother. I learnt an enormous amount from both of them.

It is hard to find words to express my gratitude to these people.

I learnt a lot from all the other speakers of the Tariana dialect of Santa Rosa – who told me stories, or came to chat – Ricardo Brito (Diká) and his sons Emílio and Raimundo; José Manoel Brito and his children Sebastião (Saba), Cristiano (Kiri), João (Ñu), Clementina and Joaquina; Juvenal, Abelardo and their mother Amélia (a Guanano herself); Cristina, married to Abelardo; Jacinto Brito, and Batista Brito. Américo Brito, the oldest living speaker of Tariana, shared with me his eyewitness accounts of the offering feasts – he is the only living Tariana to have seen them.

The women in Santa Rosa made an effort to communicate with me and help me in many ways. Some spoke Tariana, like Cecília (Leonardo's wife). With others, our language of communication was rudimentary Tucano and Portuguese. I am deeply grateful to Edna Lúcia, Maria do Carmo, Clemência, Marília, Silvana and Maurília. Feli Brito (Batista's son) knew no Tariana – I am grateful to him simply for being kind. And there are so many more people to thank – Eduardo Brito and his wife Antônia; Júlia Brito and Nestor Brito – for their hospitality and friendship.

My warmest gratitude also goes to the people of Periquitos, for teaching me their variety of Tariana, and for their perseverance in maintaining the language and speaking it to their children. I am grateful to the elders: Marino and Jorge Muniz; to the younger generation: Domingo, Ismael, Batista, Dário, Vivaldo, Gustavo and João Bosco; and to the women of Periquitos – Alice, Maria Carlota, Ester Belinda and others – who are quietly determined to save Tariana. The future of the language is in their hands!

I met Roni Lopez, a speaker of the Santa Terezinha dialect, just once. I am deeply grateful to him for his patience and interest in teaching me his dialect.

I would also like to acknowledge my debt to Padre Casimiro Bekšta, an expert on the area of the Upper Rio Negro and the Vaupés, who frequently helped with information and advice. He was the first person to mention to me, back in 1990, that Tariana is still

spoken by a very remote group, upstream from Iauaretê. And he has, ever since, been a real encyclopedia of the Upper Rio Negro region for me. I have also profited from discussions with Elias Coelho, Janet Barnes, Henri Ramirez and Stephen Hugh-Jones.

I am grateful to all my ex-students and friends from Brazil, who accompanied me at the initial stages of fieldwork and provided me their friendship and support – Simoni Valadares, Tatiana Santos, Marcos Baltar, Antônio Augusto de Souza Melo, Cristiane Cunha de Oliveira and especially Rute Maria Coelho.

This grammar would have been impossible without the assistance, support and friendship of Silvana and Valteir Martins. Lenita and Elias Coelho provided me with a second home in São Gabriel da Cachoeira, looking after me, and giving me advice in every aspect of life, and concerning fieldwork in the remote areas of the Upper Rio Negro.

My gratitude goes to all those people from the Upper Rio Negro area who taught me their languages: Humberto Baltazar and Pedro Ângelo Tomas (Warekena); the late Candelário da Silva (Bare); Afonso, Albino and João Fontes, Celestino da Silva, Cecília and Laureano da Silva and the late Marcília Rodrigues (Baniwa); the late Tiago Cardoso (Desano, Piratapuya), and also Alfredo Fontes (Tucano).

Warmest thanks go to Sisters Aline Sienkiewicz, Dária Moratelli, Cristina, Rita and Ireni – who looked after me in so many different ways, making their mission welcome for me – during my stays in Iauaretê.

All those who participated in the Tariana literacy class and helped organise it deserve separate thanks. Marta Azevedo provided us with the infrastructure and food; she also organised a Pedagogical workshop which resulted in the creation of quite a number of stories in Tariana. And without Glória da Silva, Cecília da Silva, Lourdes Brito, Galdino Pinheiro, Pedro Jesús, Padre Jesus, Padre Benjamim, Sister Dária Moratelli, Jaqueline Brito, Vanilde Brito, Nestor Brito and many, many others, this course would not have happened.

I am most grateful to those who read through the whole draft of this book, or parts of it, and provided comments, corrections and ideas – Willem Adelaar, Avery Andrews, Timothy J. Curnow, Antoine Guillaume, Keren Rice, Tom Payne, Gunter Senft, Fritz Serzisko and Mary Ruth Wise. Invaluable comments on almost every page came from R. M. W. Dixon, without whose constant encouragement and support I would have never completed this grammar.

Tonya Stebbins and Carol El-Chaar carefully read through the draft of this book and corrected it. Adam Bowles formatted the volume with meticulous care. Thanks are equally due to them. Siew Peng Condon provided a wonderful working atmosphere at the Research Centre for Linguistic Typology. This book would have been scarcely possible without her.

I gratefully acknowledge the Wenner Gren Foundation for a grant which made my fieldwork financially feasible.

## Organisation and cross-referencing

A brief overview of the linguistic profile of Tariana is found at the beginning of Chapter 1. Phonology is discussed in Chapter 2. Chapter 3 contains an outline of word classes. Chapters 4–20 deal with various aspects of morphology, while syntactic issues are considered in Chapters 21–24. Chapter 25 deals with discourse organisation, and Chapter 26 provides a brief sketch of semantic issues, especially those relevant to the understanding of the grammar.

Here and *passim* '-' stands for any morpheme boundary, that is, a boundary between a root and an affix, or between two roots. The symbol '=' indicates a boundary between a root and a clitic, or an affix and a clitic, or two clitics (see Chapter 2). The symbol ´ indicates a primary stress, and ` indicates a secondary stress (obligatory on enclitics). Stress is marked on each example in Chapter 2 ('Phonology') and in other chapters only if it is relevant to the discussion. Since nasal vowels and long vowels are always stressed, stress on these is not marked.

In Tariana there is a considerable amount of variation between certain allophones (discussed in Chapter 2). Examples of alternative pronunciations are *yápi*, *ñápi* 'bone', *yápu*, *ñápu* 'stream', *yama*, *ñama* 'two', *pamúya*, *pamúña* 'middle', *-pidena*, *-pidana* 'remote past reported', *-naku*, *-nuku* 'topical non-subject', *-nuka*, *-naka* 'present visual', *di-keña*, *di-keñwa* 'he begins'. There is also variation between long vowels and short vowels, e.g. *ke:/i*, *ke/i* 'moon', *na:*, *na* 'they went, they said'. Most of these variants depend on the age and proficiency of the speaker; every example in this grammar records the actual pronunciation by the consultant.

Examples are numbered separately for each chapter. All the examples and texts are supplied with an interlinear morpheme gloss, and then translated into English. Homophonous morphemes (e.g. *-nha* 'pausal marker; interrogative present visual; imperative (containing doubt)') are differentiated by their glosses. The symbol '+' is used to indicate fused morphemes, e.g. *di/eta* 'he ordered' is glossed as 3sgnf+order+CAUS, its underlying form being *di-* (3sgnf) *-i/a* (order) *-ita* (CAUS). Portmanteau morphemes are glossed with a ':', for instance, *-peni* (PL:ANIM) 'plural.animate'. All grammatical morphemes are glossed in small caps while lexical morphemes are glossed in lower case. Pronominal prefixes are shown as 1sg, 3pl, in lower case. For polysemous morphemes, different translation in glosses corresponds to different meanings; for instance *-kaka* 'reflexive-reciprocal' is glossed as REFL when it has reflexive meaning and as RC when it has reciprocal meaning.

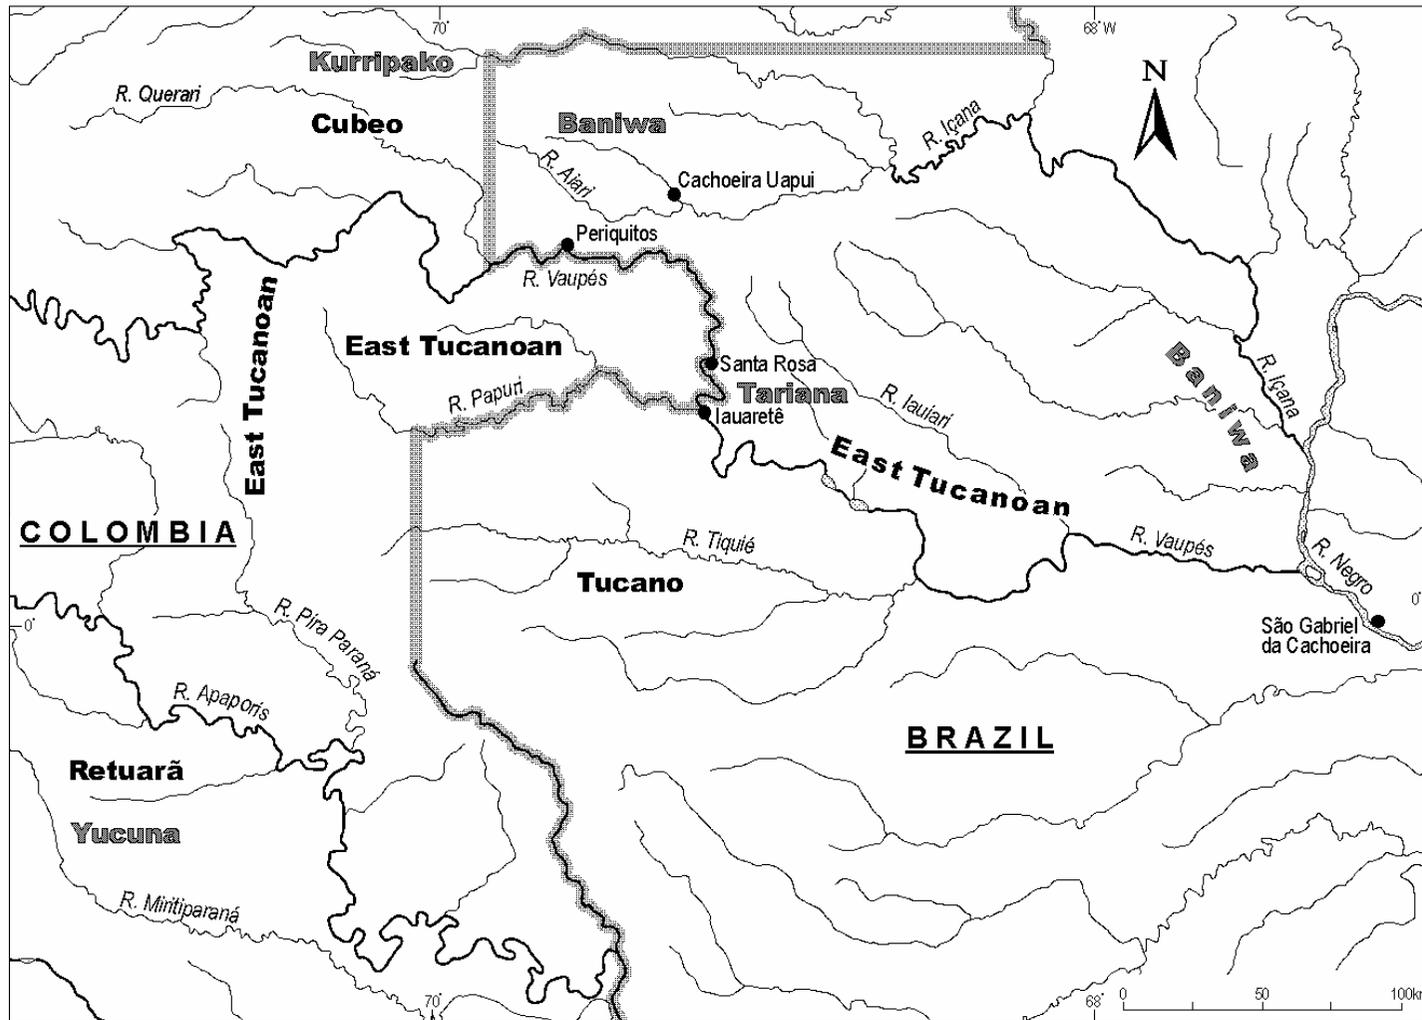

Cross-references are of two kinds:

- those preceded by § refer to chapter and section number, e.g. §11.1 refers to section 1 of Chapter 11;
- those beginning with a number refer to examples in the grammar, e.g. 11.1 refers to example 1 in Chapter 11.

## Abbreviations

A	transitive subject	FUT.CERT	certain future
ABSTR	abstract	FUT.UNCERT	uncertain future
ACT.CONTR	action contrast	GEN	generic
ADM	admirative	GEN.INFR	generic inferred
ADV	adverbial	HAB	habitat
AFF	derivational affix	HABIT	habitual
ANIM	animate	HORT	hortative
